Aims of the field work

Corona virus affected the entire world, and it left an indelible scar in the minds of the millions. As a result, the condition of common people remained very painful. That is why, our students went to the small villages located around Malbazar and talked to them, their economic condition during Covid-19, what problems did they have to face during Covid-19, how is the condition of education in rural life, about working in tea gardens. They discussed the condition of the workers, their dreams and aspirations. They tried to understand the reality of the way of life in the entire Dooars.

Therefore, the main aims of our field work is to introduce students to ordinary life. To make one aware of the reality of life, to bring to them the shattering dreams, and the ground reality, we put in our best to introduce them to the reality of life.

Outcome of the field work

1. Seeing the condition of uneducated people, the desire for education was awakened among the students.
2. Seeing the condition of common people during the lockdown and Corona period, there was an outpouring of compassion within the students.
3. Students connected with normal life.
4. They understood the importance of education.
5. They became familiar with the difficulties of life.
